

# CS30 Driver Installation Instructions

1. Before running the driver installer, please ensure that the anti-virus software has been turned off, otherwise it may be mistaken as a virus that cannot be installed normally.
2. The following screen appears when running the driver. Wait a moment.

3. The console is installed successfully when the screen shown below appears.

4. After accessing the CS30, the device information shown in the following figure can be displayed in the device manager.
